Sonu Kumar Thakur

SonuSk584 | sonu-thakur | sonukumart74@gmail.com

Summary

CS Engineering graduate and full-stack developer skilled in Node.js, TypeScript, React, MySQL, and API design, with added expertise in ML and LLM-based applications. Immediate joiner eager to build and ship real-world SaaS products.

Education

2022 – 2026 **B.E. in Computer Science Engineering**, NMIT, Bengaluru **CGPA: 8.7/10**

2020 – 2022 **NEB, Class XII**, Saint Xaviers College, Kathmandu **90%**

Technical Skills

Programming	Python, Java, JavaScript,Typescript, C, SQL
Machine Learning	Scikit-learn, classification, regression, feature engineering,hyperparameter tuning
Deep Learning	Neural networks, model training and evaluation
NLP & Transformers	Natural Language Processing, Transformer architectures,training and evaluation
LLMs	LLM fundamentals
Backend	Spring Boot, Node.js, Express.js, REST APIs, WebSocket
Frontend	React.js, HTML, Tailwind CSS
Databases	MySQL, MongoDB
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn
Tools & Cloud	Git, GitHub, AWS, Docker, GitHub Actions, Render

Experience

Artificial Intelligence Engineer Intern Mar 2023 – Apr 2023

Aqmenz Automation Pvt. Ltd., Bengaluru

- Built a **data cleaning and feature-engineering pipeline** using Python, Pandas, and NumPy to transform raw student performance data into model-ready datasets.
- Trained and evaluated classification models including Logistic Regression, KNN, and Decision Trees; visualized outcome trends to support analysis.

Full Stack Engineer Intern Dec 2025 – Feb 2026

Nitte Meenakshi Institute of Technology, Bengaluru

- Developed and deployed **GoFood**, a full-stack food ordering platform using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Implemented authentication, admin workflows, order management, and **Razorpay payment integration**.

Projects

Polyglot Chat [GitHub] | [Live Demo]

Java, Spring Boot, WebSocket, MongoDB, Docker, React

- Built a **real-time multi-user chat application** with authentication, message persistence, and real-time translation using Spring Boot, WebSocket, React, and MongoDB.
- Integrated a translation API with retry/backoff and graceful fallbacks; resolved duplicate WebSocket broadcasts and MongoDB unique-index issues.
- Containerized and deployed the application using Docker and Render with **GitHub Actions CI/CD**; resolved deployment-specific CORS and networking issues.

Customer Churn Prediction – Telco Dataset [GitHub]

Python, Pandas, Scikit-learn, Matplotlib

- Built a **leakage-safe preprocessing and modeling pipeline** using Pipeline and ColumnTransformer on a 7,043-customer dataset, with domain-grounded imputation and feature engineering compared against a raw-feature baseline.
- Compared five model families using stratified 5-fold cross-validation and hyperparameter tuning; selected Random Forest based on F1 and PR-AUC.
- Achieved **0.844 ROC-AUC, 0.657 PR-AUC, and 78% recall** on held-out test data; evaluated ensembling through an ablation experiment.

Certifications

Java Foundation – Infosys | AWS Academy Cloud Foundations – Amazon | DBMS – Infosys | Machine Learning with Python – Infosys
